

Natural Fibromyalgia Pain Medication

PAIN-EZE Ingredients for Pain

There are many things you can do to help control your fibromyalgia pain: take as few prescription pain medicines as possible, try some natural fibromyalgia pain medications, change pain habits that disrupt your normal lifestyle, and increase your physical and social activity so you can return to an active life, as much as possible. A recent research article by Dr. Janet Travell, Journal of Nutritional Medicine, titled *Supplements for Fibromyalgia* suggests natural substitutes for FMS pain, some of which are contained in Pain-eze - magnesium, B3, B6, Vitamin C - and the others in Nite-rest and Optimize.

Every method works differently for every patient, some things you can do for yourself, while others require help from your doctor or other health professionals. Natural Fibromyalgia Pain Medications are going to work for many patients, as you will see in our testimonials, and others are going to want prescription pain medications for fibromyalgia. Be open enough to explore all your options, you don't need unwanted side effects that contribute to your symptoms.

What Is The Suggested Dose Of Pain-Eze?

What Is Pain-Eze, Natural Fibromyalgia Pain Medication?

Pain-Eze, NATURAL FIBROMYALGIA PAIN MEDICATION is a specialized physician-formulated pain relief formula. Pain-Eze is designed to provide safe, nutritional support. Unlike prescription pain medication for fibromyalgia, Pain-Eze is

a safe natural alternative that provides the necessary dietary precursors to help the body's ability to block pain.

How Does Pain-Eze Natural Fibromyalgia Pain Medication Work?

Pain-Eze potentiates the production of neurotransmitters which slow down, if not completely stop, the sending of "pain" messages to the brain, impeding the information from being received by the "pain center" of the mind. Pain-Eze also aids the body's ability to extend the life of these natural painkillers, so the patient experiences less pain for longer periods of time, while also helping the patient to balance moods previously resulted from ongoing irritation and discomfort.

Are There Any Side Effects, And Is Pain-Eze Addictive?

Pain-Eze relieves pain through NON-artificial, NON-addicting means, assisting the body's own natural pain-relieving methods. Pain-Eze is safe. There are NO detrimental adverse side effects as with NSAIDs (Non-Steroidal Anti-Inflammatory Drugs such as Aspirin, Ibuprofen, Naproxen, and others), and there is no reduction in strength after continued use.

What Are The Ingredients In Pain-Eze Natural FIBROMYALGIA PAIN MEDICATION?

Pain-Eze contains the following scientific formulation of natural ingredients for pain:

DL-Phenylalanine, White Willow Bark, Magnesium, Capsicum Annum, Alcium Carbonate, Valeriana Officinalis, Choline Bitartrate, Fo-Ti, Radix Heraclei, Rhizoma Ligustici, Radix Morindae, Vitamin C - Ascorbic Acid, Pyridoxine HCL-B6, Niacinamide-B3, Homeopathics: Betula Verrucosa Gemmo, Aralia Quinquefolia, Arnica Montana, Berberis Vulgaris, Hypericum Perforatum, Magnesium Phosphoricum, Oxalicum Acidum, Silica, Strontia Carbonica and Thallium Metallicum.

* The ingredients are not listed in any specific order.

What Are The Pain-Eze Formula Nutrition Highlights?

Magnesium - Studies show magnesium to be helpful for fibromyalgia muscle pain. Notably, Dr. Wotton, N.D., a prominent US doctor of natural medicine, has seen a lack of magnesium in many fibromyalgia patients. "Whatever the reason for the shortage, the solution is to take a magnesium supplement. This usually relaxes the muscles, allows blood to flow into the constricted areas, and flushes out the waste products of inflammation," says Dr. Wotton.

Valeriana Officinalis - The name of this herb is derived from the Latin word "valere," "to be in health," and is an ancient

"medicinal herb." The only thing "bad" about the plant is its odor, which brings to mind the smell of stale perspiration, although cats are apparently quite attracted to it, and the perfume industry uses its strange muskiness in some of its concoctions. It is effective when taken internally, the root acting to soothe a person's stress, exhaustion, tiredness, relieving sleeplessness, calming the body and emotional distress. Most recently it has demonstrated sedative, sleep promoting actions, being used for general nervousness, restlessness, insomnia, and sleep disorders based on nervous conditions. Active substances are thought to be essential oils and mono and sesquiterpenes.

-

White Willow Bark - This particular bark has historically been used as an herb to relieve discomfort. Lately, it has been found to contain the natural pharmaceutically active compound salicin, or salicylic acid, the chemical forerunner of acetylsalicylic acid (modern aspirin) from which it is derived. Like its modern derivative aspirin, the natural chemical salicin from White Willow Bark is known to complement the body's ability to relieve discomfort, but without the possible complications and/or discomfort caused by aspirin. Thus where aspirin cannot be used, White Willow Bark has generally demonstrated effectiveness without aspirin-like side effects. Modern research has shown that its mechanism of actions is probably effected by inhibiting the neural transfer of pain signals. Its pharmacological action is antipyretic, antiphlogistic, and analgesic. It is often used for diseases accompanied by fever, rheumatic ailments and headaches.

-

Capsicum Annum - This very effective herb and hot pepper is used to relieve pain when taken internally. It is thought to interrupt the pain signal through a process of reversible desensitization. Over 30 years of recent research has demonstrated that capsaicin, the biological active component of capsicum, appears to desensitize sensory receptors on cells, thus effectively blocking pain signals from being processed. Used in Homeopathy, it has demonstrated effectiveness against relaxing muscle fibers.

What Is The Suggested Dose For Pain-Eze?

There are 60 capsules in each bottle. During pain attacks take 2 capsules every 3 hours, or as directed by a physician. Otherwise, take 2 capsules every morning and evening for maintenance.
